

Solar System Benefits

**Novergy Offers A Range of Solar Solutions
For Industries, Corporates & Businesses.**

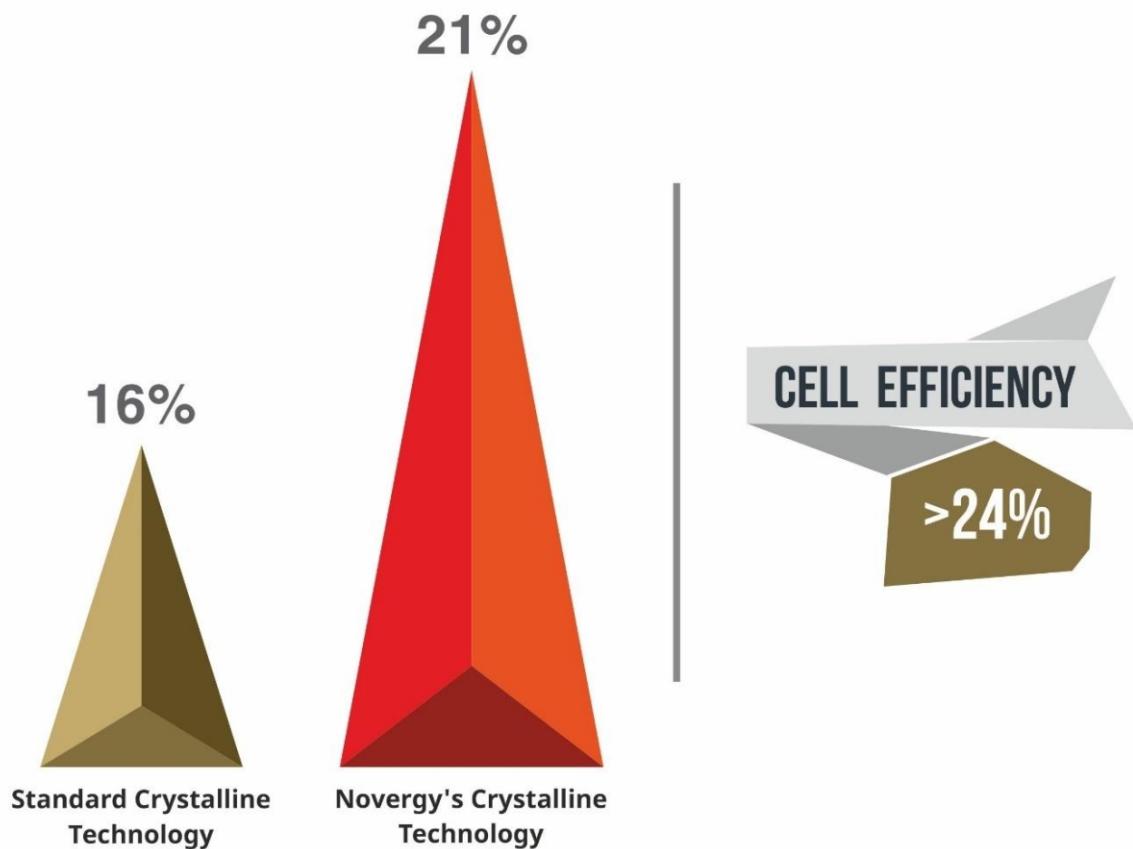

HIGHLIGHTS OF NOVERGY PRODUCTS:

Efficiency only few can deliver

GENERATE UPTO 30 PERCENT MORE SOLAR ENERGY WITH NOVERGY.

Our solar photovoltaic (PV) modules promises one of the highest efficiency quotients in the industry and lives upto it. As a global provider of durable solar power panels, Novergy has been solving power needs across industries for more than a decade. Our modules deliver more kWh energy than most other competitors.

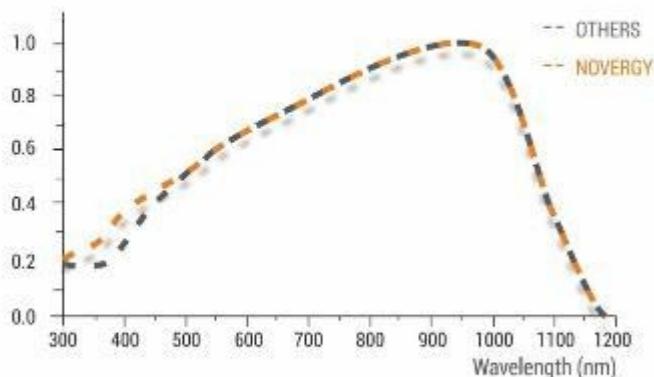

25 YEARS LINEAR POWER OUTPUT WARRANTY

25 YRS
WARRANTY

BETTER LOW LIGHT SPECTRAL RESPONSE

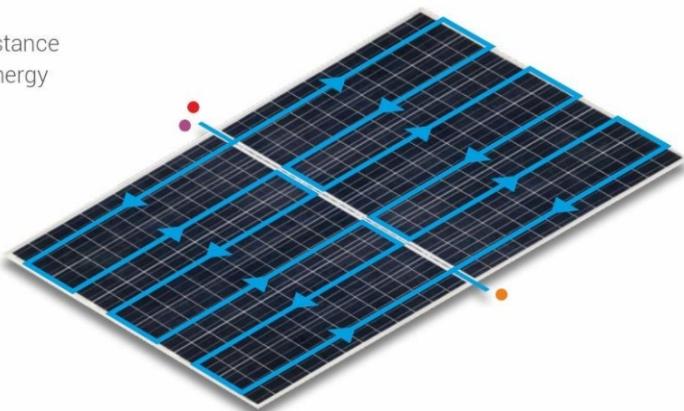

(Generates more energy during morning and evening hours. And also on cloudy or foggy days)

Latest Global Technologies

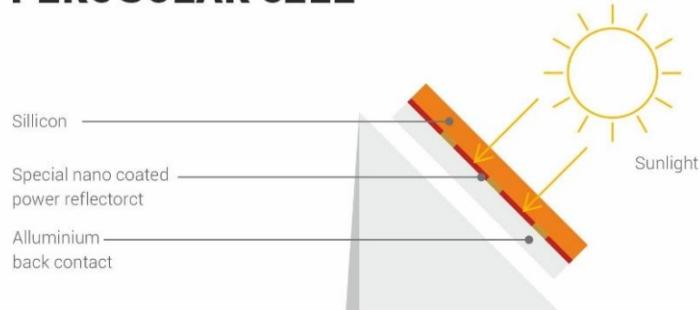

TWIN CELL

The twin sections reduce internal resistance and ensure continued production of energy when partially shaded.

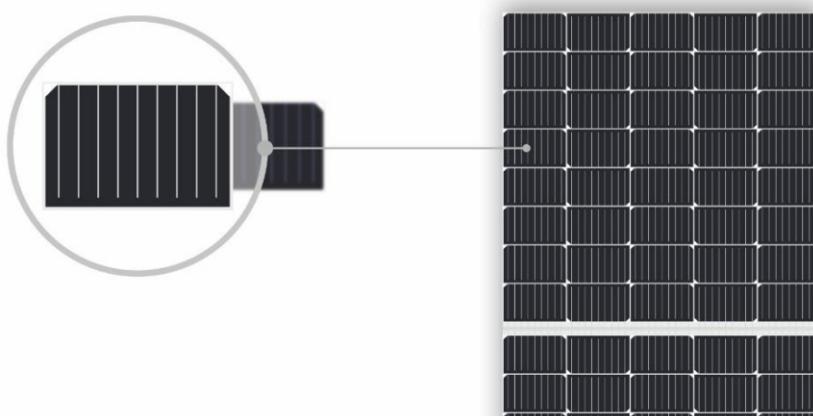

- Current flows into the panel
- Current splits to flow around the two halves of the panel
- Current rejoins and flows out of the panel

PERC SOLAR CELL

WITH MULTI-BUSBAR TECHNOLOGY (MBB)*

**Designed to Maximize Power
PROVEN PERFORMANCE
OVER GENERATIONS.**

Better Temperature Coefficient

Our PV modules have a better coefficient than conventional cells in the market. With our technology the reduction in energy yield is 0.37% only. While other standard C-Si modules reduce by upto 0.47%.

More Power per m²

Our panels generate more power in lesser space.

Anti-Reflective Coating On Glass

Due to ARC glass the modules are able to absorb more light and hence generate more power.

Lower Degradation

With use of high-grade materials, the cell degrades much lesser when first exposed to light. Hence, Reducing light-induced degradation.

MBB/5 Bus Bar Design*

Enhances current transmission and module reliability.

BETTER SOLAR INVERTERS

**Industry leading DC-AC efficiency of upto 99%
Maximum power point tracking feature High
MPP Tracking efficiency.**

**APPROVED TO BEST
INTERNATIONAL STANDARDS**

INDUSTRIES SERVED

*On select models only.

Mounting System

- Mounting system manufactured with latest computerized CNC technology.
- High-quality, corrosion resistant materials only used.
- SS Fasteners used.

Web-based monitoring system:**

- Online web-based real time monitoring & data logging system.
- Can be accessed by customer throughout the world using any Computer, mobile ,iPad, laptop with internet connection.

MANY MWs installed all across the globe

Installed in all types of applications and also very critical applications like Industrial systems, Oil & Gas offshore platforms, Power plants, telecom, Off-grid navigational equipment, etc.

HIGHER ENERGY GENERATION

- Generates more energy for same rated capacity at same location!
- Difference Up to 38% higher energy generation already proven!

Other advantages

- Excellent design and engineering capability
- Strong project execution track record
- Least roof space requirement to install more KW of Solar system
- Modular system with multiple units helps improve redundancy and also improves system performance.

OUR MOTTO
**POWER GENERATION
FOR GENERATIONS!!**

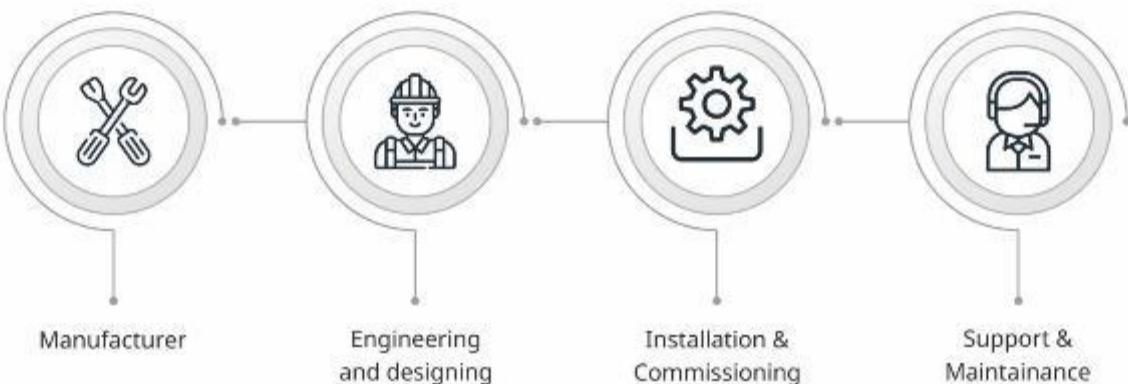

WHY NOVERGY

- Having best solar technology with the highest module efficiency in India (certified by UL labs).
- Difference in energy generation Upto as high as 50% higher already proven!!
- With our solar system you can generate more power per sq.mtr. Hence requiring least roof or ground space requirement to install more KW of Solar system.
- Strong project execution track record with very good client satisfaction record.
- Integrated player offering product, design, engineering, execution and support at a single point..
- Already well proven and most reliable systems with NIL replacement record in nearly 14+ years
- Solar systems already trusted since last several years by many leading corporates, MNCs, PSUs, Industries, etc.
- Extremely low degradation assuring longer life and assured performance.?

SINGLE POINT RESPONSIBILITY

We are India's most reliable integrated solar player

TRUSTED SOURCE

Novergy Solar systems are trusted by leading companies and organizations like:

CERTIFICATIONS / ACCREDITATIONS

Novergy is certified / accredited by leading organizations like:

- TUV Rheinland, Germany
- Clean Energy Council, Australia
- IEC
- UL
- MNRE, India
- DNV

EMPANELLED /REGISTERED WITH

GLOBALLY ACCEPTED

These systems are exported to nearly

30 COUNTRIES

worldwide including Switzerland, Italy, Spain, Belgium, Kenya, Nigeria, Oman, Sri Lanka, Mozambique, Senegal, Australia, Tunisia, etc.
